

# DIG A DINOSAUR SKELETON BRACHIOSAURUS

**▲ WARNING:**  
**CHOKING HAZARD** Small parts.  
Not for Children under 3 years.

## A. SAFETY MESSAGES

1. Please read through these instructions before you start.
2. Adult assistance and supervision are required.
3. The dug out plaster dust may irritate the eyes, nose and throat. Handle with care. Adult supervision is required. Do not place the material in the mouth or apply it to the body. Avoid contact with the eyes and inhalation of dust. In case of eyes contact, flush with water and consult your physician if discomfort persists. During the digging process, periodically remove the dust with the brush. Do not blow them over. Use a water spray bottle to dampen the dust as this will cause them to cling on the work surface. (Attention: wet plaster may stain. Wear an apron or working clothes.) Protective goggle or face mask may be worn for further protection during digging.
4. This kit is intended for children aged over 8.
5. This kit and its finished product contain small parts which may cause choking if misused. Keep away from children under 3 years old.

## B. REMARKS

1. Always work on a solid, level surface. We recommend that you cover the work surface with newspaper to protect the working surface and aid in clean-up.
2. Wear a smock or old clothes. Plaster may stain some clothing. Use laundry detergent on soiled clothing and wash separately.
3. Dispose of plaster in the trash. Do not put the plaster powder down the sink or bathtub drains as this may result in a clog.

**Note:** The kit is intended for kids to imitate a paleontologist digging for fossils. The digging process has to be done with patience like real paleontologist. The whole process may take a few hours or days to complete. That is the essence of the digging fun. If you would like to quicken the digging process, you may spray some water on it or even submerge the whole block into a sink of water for a minute before digging. This will soften the plaster. However, this may undermine the “digging fun” intended. Also be aware that wet plaster may stain.

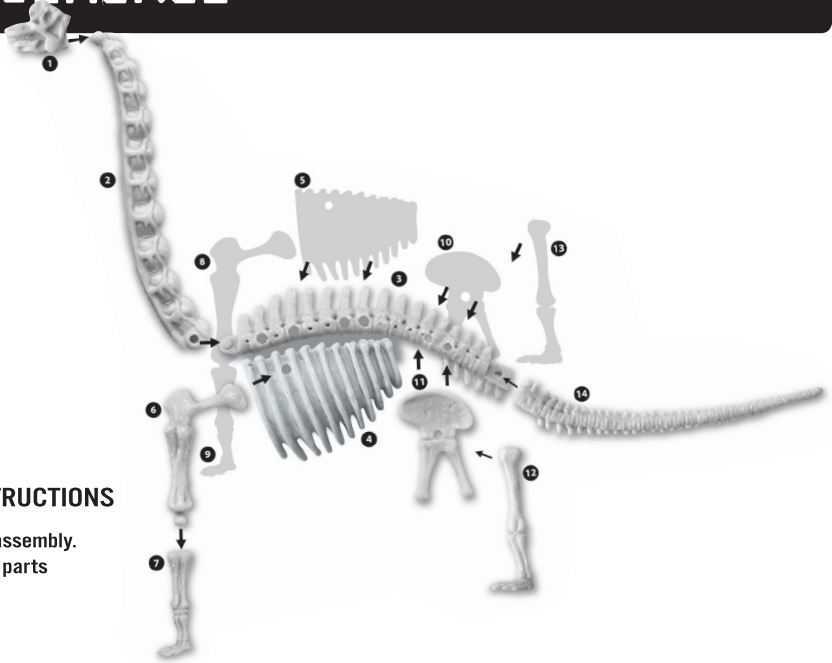

## C. CONTENTS

- 1 plaster block with dinosaur skeleton embedded, 1 soft wax for positioning the joints, 1 specially designed digging tool, 1 brush, 1 prehistoric scene backdrop with fun facts printed.

## D. INSTRUCTIONS

1. Gently scrape away the plaster with the flat side of the digging tool. When your dinosaur skeleton begins to emerge, dig with care!
2. Use the brush to dust off the remaining plaster from the dino skeleton.
3. Any remaining dust can be wiped off with a damp cloth. Use the tip of the brush to clean the remaining plaster inside the slots for easy assembly.
4. When you have found all parts of the dinosaur, follow the Assembly Instruction to assemble the whole model.
5. You may use the soft wax included to secure the joints' positions. Place the wax at your palm for a while your body warmth will soften the wax. Fill the joint space with a small piece of softened wax before you assemble the skeletons. The wax will harden again when it is cooled and will hold the skeleton in position. You may reposition the skeletons whenever you want by using the wax.
6. Construct your cardboard backdrop. Firstly fold up the base along the folded line. Then insert the cardboard back to the slot of the base. The cardboard structure can be strengthened by using the soft wax provided or adhesive tape from your home. Pose your dinosaur. Position it onto the display by using the soft wax again. It makes a cool room decor.

## E. ASSEMBLY INSTRUCTIONS

Follow the diagram for assembly.  
Brachiosaurus: Total 14 parts

## F. FUN FACTS

### DID YOU KNOW...

- The name 'Brachiosaurus' means 'arm lizard'. It was named because its front legs are much longer than its back legs.
- The first Brachiosaurus was discovered in 1900 in Colorado, USA. But the best fossils were found in Tanzania, Africa, in 1909.
- Brachiosaurus had sharp, chisel-like teeth for nipping off fruit, leaves and cones from high up in the treetops. It could not chew so it swallowed stones to help grind up its food in its stomach.

Be a dinosaur expert, look for the fun facts printed at the back of the display. Learn while you are having fun.

### QUESTIONS AND COMMENTS

We value you as a customer and your satisfaction with this product is important to us. If you have comments or questions, or you find any part of this kit missing or defective, please do not hesitate to contact our distributor in your country. You will find the address printed on the package. You are also welcome to contact our Marketing Support Team: Email: [infodesk@4m-ind.com](mailto:infodesk@4m-ind.com), Fax (852) 25911566, Tel: (852) 28936241, Web site: [WWW.4M-IND.COM](http://WWW.4M-IND.COM)
