VI

We have supplied you with an adhesive label in your language and now request that you please apply this in place of the English text on the specification plate before first commissioning the machine.

Überkleben Sie den englischen Text auf dem Leistungsschild vor der ersten Inbetriebnahme mit dem mitgelieferten Aufkleber in Ihrer Landessprache.

Avant la première mise en service, collez l'autocollant livré dans votre langue nationale sur le texte anglais de la plaque signalétique.

Prima della prima messa in esercizio, coprire il testo inglese della targhetta di fabbrica con l'etichetta fornita a corredo nella Sua lingua nazionale.

Tape the text in English on the placard indicating power before the machine is put into operation with the label supplied in the language of your country.

Por favor, cole o autocolante na sua língua nacional juntado sobre o texto em inglês na placa das características do equipamento antes da primeira colocação em serviço.

Plak de Engelse tekst op het vermogensplaatje vóór de eerste inbedrijfstelling af met de bijgeleverde sticker in uw taal.

Inden idriftsættelse første gang skal den medfølgende mærkat med dansk tekst klæbes oven på den engelske tekst på mærkepladen.

Før første ibrugtagning skal det klæstes over prestasjonsetiketten med opplysninger på engelsk språk. Til dette er det vedlagt et klebemerket med opplysninger på deres språk.

Före första idrifttagning: Klistra över den engelska texten på märkskylten med medföljande etikett på det aktuella landets språk.

Liimaa ennen ensimmäistä käyttöönottoa mukana toimitettu maasi kielinen tarra laitteen tyyppikilven englanninkielisen tekstin päälle.

Πριν την πρώτη θέση σε λειτουργία κολλήστε την συμπαρομαστούμενη αυτοκόλλητη ετικέτα στοιχείων με κείμενο στη μητρική σας γλώσσα πάνω στο αγγλικό κείμενο.

Ilk defa çalıştırma başlamadan önce birlikte gönderilen yapıştırıcı ile kendi ülke lisanınızda İngilizce metni verim tabelasının üzerine yapıştırınız. Před prvním zprovozněním přelepte anglický text na výkonovém štítku samolepkou s českým textem, která je součástí dodávky.

Před prvním uvedením do prevádzky prelepte anglický text na výkonovom štítku samolepkou so slovenským textom, ktorá je súčasťou dodávky.

Przed pierwszym uruchomieniem należy nakleić na angielski tekst tabliczki mocy załączoną naklejkę w języku Pańskiego kraju.

Ragassza az első üzembekhelyezés előtt az anyanyelvén mellékelt matricát a teljesítménytáblán lévő angol nyelvű szövegre.

Pred prvým zagonom prelepte angleško besedilo na podatkovni tablici z dobavljeno nalepko v jeziku vaše države.

Oblijepite engleski tekst na pločici snage prije prvotnog puštanja u rad sa suisoručenom naljepnicom na Vašem jeziku.

Pirms pirmās pieņemšanas ekspluatācijā angļu valodas tekstus firmas lēditi ir jāaizīmē ar piegādāto uzlīmē Jūsu dzimtajā valodā.

Prieš pradėdami eksploatuoti, užklijuokite pridėtą lipduką valstybine kalba ant teksto anglų kalba duomenų lentelėje.

Enne ekspluatatsiooni võtmist tuleb ingliskeelse tekstile firmalaual peale liimida vastav kleebis Teie emakeeles.

Перед первым вводом в эксплуатацию заклейте английский текст на фирменной табличке прилагаемой наклейкой на вашем языке.

Преди първото пускане в експлоатация залепете приложената лепенка на Вашия език върху английския текст на табелката с технически характеристики.

Lipiti eticheta livrată în limba țării dvs., înainte de prima punere în funcțiune, peste textul în engleză de pe tablăta indicatoare a caracteristicilor mașinii.

Пред првото пуштање во употреба поставете ја доставената лепенка на јазикот на вашата земја врз текстот на англиски јазик што се наоѓа на плочката со карактеристики.

最初操作前請將附送的貴國語言貼紙貼到英文銘牌上。

Total vibration values (vector sum in the three axes) determined according to EN 61029. Vibration emission value a _h Sawing of wood Uncertainty K=	3,5 m/s ² 1,5 m/s ²	2,4 m/s ² 1,5 m/s ²

*PS ≙ Mitresaw

WARNING

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN 61029 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

WARNING!

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/ or serious injury.

Save all warnings and instructions for future reference.

SAFETY INSTRUCTIONS

Wear ear protectors. Exposure to noise can cause hearing loss.

Always wear goggles when using the machine. It is recommended to wear gloves, sturdy non slipping shoes and apron.

The dust produced when using this tool may be harmful to health.

Do not inhale the dust. Use a dust absorption system and wear a suitable dust protection mask. Remove deposited dust thoroughly, e.g. with a vacuum cleaner.

Appliances used at many different locations including open air should be connected via a residual current device (FI, RCD, PRCD) of 30mA or less.

Before doing any work on the machine, pull the plug out of the socket.

Only plug-in when machine is switched off.

Keep mains lead clear from working range of the machine. Always lead the cable away behind you.

Before use check machine, cable, and plug for any damages or material fatigue. Repairs should only be carried out by authorised Service Agents.

The handle lock must always be engaged when transporting the mitre saw.

Ensure that the machine is always stable and secure (e.g. fixed to a bench)

Keep the floor area free of loose material e.g. chips and cut-offs.

Before using the tool please read the instructions. If possible have the tool demonstrated.

Always use the protective shields on the machine.

Only use the saw with guards in good working order and properly maintained, and in position.

Do not clamp the protective swing guard.

Refrain from removing any cut-offs or other parts of the workpiece from the cutting area whilst the machine is running and the saw head is not in the rest position.

Never reach into the danger area of the machine when it is running.

Any faults with the machine, including any related to the safeguard or the saw blades, must be reported to the persons in charge of safety as soon as the faults are discovered.

Do not use any flanges other than those supplied or indicated in the instruction manual to secure the saw blade.

Replace the table insert when worn

Do not use saw blades which are damaged or deformed

Do not use saw blades not corresponding to the key data given in these instructions for use.

Do not use saw blades made of high-speed steel.

Only use saw blades which have been properly sharpened. It is essential to adhere to the maximum speed specified on the saw blade.

Transport and store the tools in a suitable receptacle.

It is necessary to select a saw blade which is suitable for the material being cut.

Never use the mitre saw to cut materials other than those specified in the instruction manual.

Long workpieces must be adequately supported.

Stock having a round or irregular cross section (such as firewood) must not be cut, as it can not be securely held during cutting. When sawing thin stock layed on edge, a suitable auxiliary fence must be used for firm support.

Do not stare into beam. Do not point laser light at other persons.

Do not view directly into beam with optical instruments (binocular, telescope).

Do not point laser at reflective surfaces, Avoid exposure to laser radiation. Laser may emit hazardous radiation.

Do not replace the installed laser with a different type.

Any repairs must only be carried out by the authorized service agent.

Do not use this tool 's dust extraction as a vacuum cleaner to pick up anything, such as hardness work pieces or nails etc. it will cause the fan damage.

SPECIFIED CONDITIONS OF USE

The mitre saw can be used for sawing solid wood, bonded wood, glued veneer, materials similar to wood, aluminium profiles, Non-ferrous metals and plastics.

Do not use this product in any other way as stated for normal use.

RESIDUAL RISK

Even when the product is used as prescribed, it is still impossible to completely eliminate certain residual risk factors. The following hazards may arise in use and the operator should pay special attention to avoid the following:

- Impairment of hearing, restrict exposure and wear appropriate hearing protection.
- Measures that can be taken by operator to possibly reduce the effects of vibration and limit the amount of exposure.
- Health hazards caused by breathing dust developed when sawing wood, wear a mask if necessary.

EC-DECLARATION OF CONFORMITY

We declare under our sole responsibility that the product described under "Technical Data" fulfills all the relevant regulations and the directives 2011/65/EU (RoHS), 2004/108/EC, 2006/42/EC and the following harmonized standards have been used:

EN 61029-1:2009 + A11:2010

EN 61029-2-9:2009

EN 55014-1:2006+A1:2009+A2:2011

EN 55014-2:1997 + A1:2001 + A2:2008

EN 61000-3-2:2006+A1:2009+A2:2009

EN 61000-3-11:2000

Winnenden, 2013-10-01

Alexander Krug / Managing Director
Authorized to compile the technical file

Techtronic Industries GmbH

Max-Eyth-Straße 10, 71364 Winnenden, Germany

MAINS CONNECTION

Connect only to single-phase AC current and only to the system voltage indicated on the rating plate. It is also possible to connect to sockets without an earthing contact as the design conforms to safety class II.

A power spike causes voltage fluctuations and may affect other electrical products in the same power line. Connect the product to a power supply with an impedance equal to 0.3Ω to minimize voltage fluctuations. Contact your electric power supplier for further clarification

EN

MAINTENANCE

Be sure to disconnect the tool from the power supply before attaching or removing the saw blade.

Clean the tool and guarding system with clean cloths.

The ventilation slots of the machine must be kept clear at all times.

Use only AEG accessories and spare parts. Should components need to be replaced which have not been described, please contact one of our AEG service agents (see our list of guarantee/service addresses).

If needed, an exploded view of the tool can be ordered. Please state the machine type printed as well as the six-digit No. on the label and order the drawing at your local service agents or directly at: Techtronic Industries GmbH, Max-Eyth-Straße 10, 71364 Winnenden, Germany.

SYMBOLS

CAUTION! WARNING! DANGER!

Always disconnect the plug from the socket before carrying out any work on the machine.

Please read the instructions carefully before starting the machine.

Always wear goggles when using the machine.

Wear ear protectors!

Wear gloves!

Always keep hands away from the path of the saw blade.

Never expose tool to rain.

Do not stare into beam.

This product corresponds to the laser class 2 in accordance with EN 60825-1:2007

Do not dispose of electric tools together with household waste material! In observance of European Directive 2002/96/EC on waste electrical and electronic equipment and its implementation in accordance with national law, electric tools that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility.

Class II tool, tool in which protection against electric shock does not rely on basic insulation only, but in which additional safety precautions, such as double insulation or reinforced insulation, are provided. There being no provision for protective earthing or reliance upon installation conditions.
