

1 Your mobile

1.1 Keys

- Send Key ()
- Access call log from idle
 - Accept an incoming call
 - To dial the number focused on the screen
- End Key ()
- Power on (long press)
 - Return back to idle from any other state
 - Turn off the backlight and lock the screen (short press in idle screen)
 - Long press in idle to access 'quick profile + power off'
- Navigation keys (in idle screen):
- Up to message
 - Down to Camera
 - Left to alarm
 - Right to Bluetooth menu
- Central key ()
- Open Main Menu in idle
 - Confirm/ok/select in other state
- Play/pause key (side middle key)
- Play/pause music
- Volume keys (side keys)
- Adjust general volume (short press)
 - Go or return to previous/next song (long press)

1.2 Main screen icons ⁽¹⁾

- Battery charge level.**
- Vibrate alert:** your phone vibrates, but does not ring or beep with the exception of the alarm.
- Bluetooth status** (Blue - Activated).
- Bluetooth status** (Connected to an audio device).
- Headset connected.**

⁽¹⁾ The icons and illustrations in this guide are provided for informational purposes only.

- Keypad locked.**
- Call forwarding activated:** your calls are forwarded.
- Alarm clock or appointment(s).**
- Level of network reception.**
- Voicemail message or PUSH message arrived.**
- Unanswered calls.**
- Radio is on.**
- Web alerts ⁽¹⁾.**
- Roaming.**
- Memory card scanning in progress.**
- Memory card scanning completed.**
- Line switching ⁽²⁾:** indicates the selected line.
- GPRS attached.**
- GPRS connecting.**
- Music player active.**
- Message receipt in progress.**
- Sending a message.**
- Silence mode:** your phone does not ring, beep or vibrate.
- Message unread.**
- Message list is full:** your phone cannot accept any new messages. You must access the message list and delete at least one message on your SIM card.
- Flight mode.**
- Bluetooth headset connected.**

⁽¹⁾ Depending on your network operator.
⁽²⁾ Contact your network operator to check service availability.

2 Getting started

2.1 Let's go

Removing and installing the back cover

Inserting and installing the battery, SIM card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press it and slide it out.

2.2 Power on your phone

Hold down the key until the phone powers on.

2.3 Power off your phone

Hold down the key until the pop-up "Profile tab" appears, then select "Power off" and confirm.

3 Calling.....

3.1 Making a Call

Dial the desired number then press the key to place the call. If you make a mistake, you can delete the incorrect digits by pressing the key.

To hang up the call, press the key.

Making an emergency call

If your phone is covered by the network, dial emergency number and press the key to make an emergency call. This works even without a SIM card and without typing the PIN code ⁽¹⁾.

3.2 Calling your voicemail ⁽²⁾

Your voicemail is provided by your network to avoid missing calls. It works like an answering machine that you can consult at any time. To access your voicemail, hold down key.

3.3 Receiving a call

When you receive an incoming call, press the key to talk and then hang up using the key.

3.4 Available functions during the call

During a call, you can use your directory, short messages, etc. without losing your correspondent.

⁽¹⁾ Depends on local regulations.

⁽²⁾ Contact your network operator to check service availability.

4 Calls

4.1 Call log

You can access your call memory by pressing key from the idle screen. Choose the option of the desired list: **Outgoing call(s)**, **Missed call(s)**, **Answered call(s)**.

4.2 My numbers

Type in or modify your telephone number or the number to access your voicemail and confirm by clicking. Your telephone number is usually written on your SIM card.

4.3 Billings

You can access different items with this option: Amount, Duration, GPRS counter, Beep duration.

4.4 Call settings ⁽¹⁾

You can access a number of items with this option: Call waiting, Call forwarding, Call barring, Caller ID, Auto redial.

⁽¹⁾ Contact your network operator to check service availability.

5 Directory.....

5.1 Consulting your directory list

In Idle interface, click icon to access the **contacts**.

5.2 Create contact

Select the contacts list in which you wish to add a contact to, press the "Options" softkey, select "Create contact" then .

6 Messages

You can create, edit and receive SMS and MMS ⁽¹⁾ with this mobile phone.

MMS enables you to send images, photos, animations and sounds to other compatible mobiles.

6.1 Create text/multimedia message ⁽¹⁾

You can click in idle interface to create a message. Or select "Messages" from the Main Menu to create text/multimedia messages.

You can type a message, but you can also modify a predefined message in "Templates" or customise your message by adding pictures, photos, sounds, titles, etc. (only available while editing an MMS). While writing a message, select "Options" to access all the messaging options.

You can save standard messages to **Drafts** or **Templates** (MMS only).

⁽¹⁾ Depending on your network operator.
 English - CJB2220ALAAA

7 Camera

Your mobile phone is fitted with a camera for taking photos that you can use in different ways:

- store them in your "File manager";
- send them in a multimedia message (MMS) to a mobile phone or an email address;
- customise your main screen;
- select them as incoming call image to a contact in your directory;
- transfer them by data cable or microSD card to your computer;

7.1 Camera

Select to access the function from main menu.

7.2 My creations

This feature stores all the photos captured by your mobile phone.

8 Applications.....

8.1 Music player

Access to main menu "Applications" and select "Music player". You will have full flexibility of managing music both on your mobile and memory card.

8.2 Radio

Your phone is equipped with FM radio ⁽¹⁾ with RDS functionality. You can use the application as a traditional radio with saved channels or with parallel visual information related to the radio program on the display if you tune to stations that offer Visual Radio service. You can listen to it while running other applications.

8.3 Image viewer

A library links to the pictures in "My creations" and "My images" in phone to be shown in list, slide, or thumbnail, set as **Wallpaper**, **Screen saver**, **Power on/off display**, and **Contact ID**, or sent by **MMS**, **Bluetooth**.

9 Web

Internet is a mobile internet portal service which allows you to obtain information such as weather conditions, news, sport and download new ringtones, wallpapers, music.

Homepage

- Launch the Web browser with the homepage of the default profile.

Bookmarks

- Access your favorite sites.

Recent pages

- Pages which you recently viewed.

Offline pages

- Pages available for offline viewing.

Go to URL

- Enter the URL of Web site.

Profiles

- Customise your Web access.

⁽¹⁾ The quality of the radio depends on the coverage of the radio station in that particular area.

10 Tools.....

10.1 Services

Contact your network operator to check service availability.

10.2 Alarm

Your mobile phone has a built-in alarm clock with a snooze feature.

10.3 Bluetooth

To use your phone with a Bluetooth device, you need to proceed in two steps:

- Pair and register the device to your phone,
- Select it to use hands-free communication. Only one Bluetooth audio device (your Bluetooth headset or your Bluetooth car kit) can be connected during the communication.

10.4 Calendar

Once you enter this menu from "Tools", there is a monthly-view calendar for you to keep track of important meetings, appointments, etc. Days with events entered will be marked in color.

10.5 Calculator

Enter a number, select the type of operation to be performed, and enter the second number, then press key to display the result. To return to the main screen, click area.

10.6 Memo

You can create a **Text note** or **Voice memo** by accessing "Memo".

10.7 World clock

The World clock shows current local time and the time in different cities. You may view up to 3 cities at one time (Options: **Set as my city**). Also, you can add a maximum of 10 new cities to the list (Options: **Add**).

11 File manager

11.1 My music

Choose an audio for the Power on/off screen, for an incoming call, a message alert, power on/off ringtone or an alarm and scheduler.

11.2 My images

You can select an image or a photo as wallpaper, ON/OFF screen, or assign it to a contact in the directory.

11.3 My videos

The "My videos" album contains all video clips downloaded to the phone or memory card.

11.4 My photos

This feature stores all the photos captured by your mobile phone.

11.5 Other files

Store files of unsupported format.

11.6 Memory card

You can access all files stored in memory card here.

11.7 Memory status

Indicates how much space is used and how much is currently free on your phone and memory card (if any).

12 Settings

From the main menu, select the menu icon and select the function of your choice in order to customise your telephone: Profiles, Touch settings, Display, Time and date, Languages, Headset mode, Screen lock, Numeric keys, Input mode, Vocabulary, Security, Network, Connectivity, Call settings.

13 Latin input mode/character table ⁽¹⁾

To write messages, there are two writing methods:

- Normal: This mode allows you to type text by choosing a letter or a sequence of characters.
- Predictive with the Zi mode: This mode speeds up the writing of your text. Press the key once and the word will be modified each time you press a key. As you go on, the word will keep changing.

Safety and use

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• TRAFFIC SAFETY:
Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile when the vehicle is not parked.

When driving, do not use your phone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your phone on top of the dashboard or within an airbag deployment area,

- check with your car dealer or the car manufacturer to make sure that the dashboard is adequately shielded from mobile phone RF energy.

• CONDITIONS OF USE:

You are advised to switch off the telephone from time to time to optimise its performance.

Switch the phone off before boarding an aircraft.

Switch the phone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere.

When the phone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump, etc. In particular when using the phone, you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, pick up the call before holding your phone to your ear. Also move the handset away from your ear while using the "hands-free" mode because the amplified volume might cause hearing damage.

Do not let children use the phone and/or play with the telephone and accessories without supervision.

When replacing the cover please note that your phone may contain substances that could create an allergic reaction.

Always handle your phone with care and keep it in a clean and dust-free place.

Do not allow your phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc). The manufacturer's recommended operating temperature range is -10°C to +55°C. Over 55°C the legibility of the phone's display may be impaired, though this is temporary and not serious.

Emergency call numbers may not be reachable on all cellular networks. You should never rely only on your phone for emergency calls.

Do not open, dismantle or attempt to repair your mobile phone yourself.

Do not drop, throw or bend your mobile phone.

Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your phone model.

TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Remember to make back-up copies or keep a written record of all important information stored in your phone.

Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone.

Parents should monitor their children's use of video games or other features that incorporate flashing lights on the phones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.

- Take a minimum of a 15-minute break hourly.

- Play in a room in which all lights are on.

- Play at the farthest distance possible from the screen.

- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.

- If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow the instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders.

 Prolonged exposure to music at full volume on the music player may damage the listener's hearing. Set your phone volume safely. Use only headphones recommended by TCT Mobile Limited and its affiliates.

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow the instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders.

• PRIVACY:

Please note that you must respect the laws and regulations in force in your jurisdiction or other jurisdiction(s) where you will use your mobile phone regarding taking photographs and recording sounds with your mobile telephone. Pursuant to such laws and regulations, it may be strictly forbidden to take photographs and/or to record the voices of other people or any of their personal attributes, and duplicate or distribute them, as this may be considered to be an invasion of privacy. It is the user's sole responsibility to ensure that prior authorisation be obtained, if necessary, in order to record private or confidential conversations or take a photograph of another person; the manufacturer, the seller or vendor of your mobile phone (including the operator) disclaim any liability which may result from the improper use of the mobile phone.

• BATTERY:

Before removing the battery from your phone, please make sure that the phone is switched off.

Observe the following precautions for battery use:

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).

- Do not puncture, disassemble or cause a short-circuit in a battery,

- Do not burn or dispose of a used battery in household rubbish or store it at temperatures above 60°C.

Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries or those not recommended by TCT Mobile Limited and/or its affiliates.

 This symbol on your telephone, the battery and the accessories means that these products must be taken to collection points at the end of their life:

- Municipal waste disposal centres with specific bins for these items of equipment

- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

In European Union countries:

These collection points are accessible free of charge.

All products with this sign must be brought to these collection points.

In non European Union jurisdictions:

Items of equipment with this symbol are not to be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

• CHARGERS

Mains powered chargers will operate within the temperature range of 0°C to 40°C. The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipment use. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

• RADIO WAVES:

Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC (R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or this directive.

THIS MOBILE PHONE COMPLIES WITH INTERNATIONAL AND EUROPEAN REQUIREMENTS REGARDING EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter/receiver. It was designed and manufactured to comply with the radiofrequency (RF) exposure thresholds recommended by international requirements (ICNIRP) ⁽¹⁾ and by the Council of the European Union (Recommendation 1999/519/EC) ⁽²⁾.

These limits are part of a set of requirements and establish authorised radiofrequency levels for the public. These limits were established by independent groups of experts on the basis of regular and detailed scientific assessments. They include a significant safety margin intended to ensure the safety of all, regardless of age or state of health.

The exposure standard for mobile phones is determined by a measurement unit known as the Specific Absorption Rate or "SAR". The SAR limit is set by international requirements or by the Council of the European Union at 2 watts/kilogram (W/kg) averaged over 10 grams of body tissue. The tests used to determine SAR levels were carried out on the basis of standard usage modes with the phones transmitting at their maximum power level over the entire range of frequency bands.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to a base station antenna, the lower the power level required by the mobile phone.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to a base station antenna, the lower the power level required by the mobile phone.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to a base station antenna, the lower the power level required by the mobile phone.
